What happened was the 12/17/2014 comment was added to task #6353 erroneously when it should have been added to task 6363 (OSEC). The PR Spring Revision task is #6353. The PR Springs Revision task should still be a "P" status for pending. We are not done with the review as of yet. The comment stating the letter was sent to Rikki should then be moved to task 6363 and this task - the exploration permit extension approval should be listed with an approved status.

The task numbers were very similar which is why I'm guessing this happened.

April--

This task is shown on MTS as being completed. That's not right, is it? In the comments for the task, MTS says we gave an extension which implies it's an exploration project. I looked at the PR Spring exploration project and don't see where we've have any correspondence since September. Can you figure this out?

Marie--

Could you please make this correction in MTS? Please see April if you have questions about it. Thank you.
